## SOCIETY

PERHAPS bachelors and husbands can find some common ground for their apparently contradictory opinions of woman in the fact that she is half constant and half inconstant, steadfast in matters which her heart dictates, and inconstant where her mind, or logic alone, is appealed to. The women of the South were reproached with Bourbonism, because longer than the men, they remembered with bitterness the wounds of the civil war, but their injuries had been personal as well as political, and they were therefore constant to the lost cause. All history is thickly written with tales of the loyalty of women to such causes, their readiness to give all for a lost king or a lost country, long after the men have accustomed themselves to the idea of a new regime.

But for the constancy of woman to social ideals the men would let the social world fall into slovenly disorder, doubtless pervaded by the mired odor of stale tobacco and recently consumed spirits. No matter what satirical opinions bachelors may hold, husbands know that they have placed the women in the social trench, because their constancy could be depended upon to hold the fort. The social world is woman's place of business, her forum, her senate, her stock exchange. Can man point to institutions of his own making that have half the stability and unchangeableness of the social system?

To uphold the social system, women submit to uncounted tests of their constancy. They endure physical discomfort, ennui, the peril of cold drafts and damp places, hours of weariness, and moments of acute annoyance for the sake of what, to a man, is an unimportant social matter. And even though at times she feels that it would matter little if the whole social scheme of things should perish—and that instantly with fire and bloodshed if need be—rather than require so much of her, she stands to her colors. In the face of triumph over such anarchic moments, dare even an untired bachelor-prate of the inconstancy of woman?
